136 Garden View drive

We are asking a variance for:

Adding a 12' x 14' addition on to the back of our house, it will run in line with the north side of house

It will match the existing house set back where it meets the house, then the setback will get wider as it go's towards the back yard

Our family is out growing the size of our dining room – kitchen area, this will allow us to have a big enough table to sit all of our family around

This project will add finished Sq. Ft. and value to our home

136 Garden View drive

We are asking a variance for:

Adding a code compliance window well to the North side of house

The reason for the window well is to have a legal bedroom in the basement, and add a second full bath (house only has 1 full bath at this time)

Our family is out growing the finished size of our home, which only has the 1st and 2nd levels finished.

As our kids get older we need 1 more bedroom

This project will add finished Sq. Ft. and value to our home.
